

## **Job Title**

UL Field Representative – Richmond, VA or Fredericksburg, VA

## **About UL:**

Other companies make products. We make a difference! [Click Here!](#)

## **Our Mission: Promoting safe living and working environments.**

UL is a global independent safety science company with more than a century of expertise innovating safety solutions from the public adoption of electricity to new breakthroughs in areas such as sustainability, renewable energy, mobile payment security and nanotechnology. Dedicated to promoting safe living and working environments, UL helps safeguard people, products and places in important ways, facilitates trade and provides peace of mind.

## **Job Summary**

Under limited supervision, this motivated individual independently performs safety and non-safety certification inspections, audits, and field evaluations at various site and factory locations to ensure that they are produced and marked in accordance with the required performance standards and requirements. Analyzes and evaluates examination and test results against applicable requirements. Uses technical judgment to determine whether noncompliance variations compromise the continued application of the UL Mark and may determine if alternative is acceptable. May audit customer quality management/assurance programs.

Interprets and analyzes examination and test results against UL requirements, verifying the accuracy of manufacturers' measuring equipment and reviewing production and inspection records. Periodically reviews manufacturers' programs of production, inspection, and shipping to ensure products are produced and marked in compliance with UL requirements. Evaluates and facilitates options for corrective action where variations from UL requirements are noted.

Communicates with manufacturers and customers, Authorities Having Jurisdiction and others to conduct non-safety and safety certification inspections. Investigates the misuse of UL Mark. Assists in the promotion, marketing and selling of new and existing UL services. Works with internal and external customers to resolve technical and administrative issues. May participate in review and interpretation of quality assurance programs.

Uses instruments to perform inspections, such as micrometers, voltmeters, ammeters, and other equipment. Observes the use of manufacturer's equipment necessary to meet UL requirements. Confirms the proper calibration of manufacturers' measuring equipment and may perform calibration of UL supplied equipment.

Integrates continuous improvement concepts and techniques into all aspects of the job.

May participate in reviewing the work of other staff.

May participate in reviewing and interpreting quality assurance program requirements to assist in implementation of alternate quality-based inspection programs.

## **Job Requirements**

Some University education in Applied Science plus generally four years of directly related experience. ASQ CQA or other ASQ Certifications a plus!

Location: Work from home

Travel: Overnight travel will be required
